Continuation of Attachment(s) 3. Information Disclosure Statements (PTO/SB/08), Paper No./Mail Date: 9/14/2007 & 11/21/2007.

DETAILED ACTION

1. Claims 1-20 are allowed.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on September 14, 2007; and November 21, 2007 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Drawings

3. The drawings filed on December 2, 2003 are accepted by the Examiner.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in an interview with Stephen Schaefer on March 1, 2007.

5. Claim 13 has been amended as follows:

13. (Currently Amended) A computer readable medium ~~or propagated signal~~ having embedded thereon executable instructions that when executed cause a processor of an application system in a multiple-system environment having a central system that maintains central data objects that are shared by the multiple systems to:

in response to receiving a message from a system, the message identifying data objects having version identifiers assigned by the central system, compare the version identifiers of the data objects in the message to version identifiers of corresponding data objects stored in the local cache of the application system;

request, from the central system, a most recent copy of the data objects in the central system if the version identifiers of the data objects stored in the local cache of the application system indicate that a more recent version of the data objects exist; and

update the local cache of the application system with the most recent copy of the data objects in the central system.

REASONS FOR ALLOWANCE

6. The following is a statement of reasons for the indication of allowable subject matter:

Applicants' response filed on December 12, 2006 overcomes the prior art rejection under 35 USC § 102(b) by Mohan et al.

The prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including receiving a message from a first application system, the message identifying a

data object having a version identifier assigned by the central system; requesting, from the central system, a more recent copy of the data object in the central system if the version identifier of the data object stored in the local cache of the second application system indicates that a more recent version of the data object exists; and updating the local cache of the second application system with the more recent copy of the data object in the central system as recited in independent claim 1 and similarly recited in independent claims 9 and 13.

The remaining claims, 2-8, 10-12, and 14-20 are dependent claims, thus these claims are patently distinct over the art of record for at least the above reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

7. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
